Re: Ritek – Building Solutions Pty Ltd – Custom Roof Panels

As Watpac Project Manager for the Australian Defence Forces Single LEAP 1 project to build 500 rooms at the Gallipoli Barracks at Enoggera, Queensland, we are familiar with and have used Ritek Building Solutions custom roof panels on all defence housing associated with this project.

The LEAP project is the Defence Forces project designed to improve the standard of accommodation by providing single bedroom units for army personnel required to live-in. This accommodation features individual, self contained rooms with ensuite, limited meal preparation facilities, internet and phone connections and undercover car parking with secure storage space.

The Ritek Custom Roof Panels were chosen for a wide range of reasons:

- Design/Product values and their ability to eliminate traditional roof building structures and design by way of their significant unsupported spans;
- Their ability to reduce loads/diaphragms of design;
- Ease and speed of installation. We were able to install 800m² of roof panels per day (the equivalent of two buildings); and
- Overall project cost savings via reduced installation time; one complete roof/insulation/ceiling system; reduced equipment needs such as cranes etc., which translated to an approximate saving of \$600,000.00 plus considerable time savings in the overall project programme.

We were pleased with the attention to detail and level of service demonstrated by the whole Ritek sales and sales support team. Based on the success of the Gallipoli Barracks project, I can confidently recommend Ritek Building Solutions Ltd as a solid and reliable supplier, and experts in their field.

Yours faithfully,

WATPAC

Paul Hammond - Project Manager
